Reference: Tariff Revisions to Establish Operational and Meteorological Data Requirements for Solar Facilities and Relocate Data Requirements for Wind Facilities

On May 21, 2021, ISO New England Inc. (ISO-NE) and the New England Power Pool Participants Committee (NEPOOL), submitted revisions to ISO-NE's Transmission, Markets and Services Tariff (Tariff) to establish operational and meteorological data requirements for solar facilities and relocate and streamline already-existing data requirements for wind facilities.¹ You state that the Tariff revisions will allow ISO-NE to obtain the operational and meteorological data it needs to develop and deploy power production forecasting for solar facilities, and continue to do so for wind facilities, which is necessary to enable wind and solar facilities to be dispatched under the Do Not Exceed dispatch construct.
